PROFESSIONAL SUMMARY

Leveraging a Master's in Cyber Security and hands-on software engineering experience at Accenture, specialises in enhancing system security and compliance across complex projects while thriving in cross-functional environments. Integrates data-driven analysis, innovative automation techniques, and strong time management skills to optimise security operations and ensure regulatory adherence. Adept at collaborating with diverse teams and stakeholders from varied cultural backgrounds, aiming to satisfy clients' expectations, overcome evolving security threats and contribute to a smarter, digitally secure future.

TECHNICAL AND SOFT SKILLS

- Backend Programming Languages and Frameworks - C, C++, Python, Java, SQL, PHP, Flask, Node.js, Express.js, Spring Boot
- Coding Fundamentals - Data structures, Object Oriented Programming, Stacks, Queues
- Penetration Testing - Nmap, Metasploit, Shodan, SQLmap, Hydra, JohnTheRipper
- Frontend Programming Languages and Frameworks - HTML/CSS, Jinja2, JavaScript, React.js
- Digital Forensic Tools - Autopsy, FTK Imager, tcpdump, Volatility, ExifTool
- Soft Skills: Task Prioritisation and Time Management, Effective Communication, Cross-Functional Collaboration across Teams, Critical & Analytical Thinking
- Data Analysis Software and Libraries - MS Excel, R, MATLAB, Matplotlib, Plotly, Seaborn, OpenCV, NumPy, Pandas, Scikit-Learn, NLTK
- Malware and Log Analysis - ELK Tool, Ghidra, YARA, VirusTotal, REMnux, Wireshark

EXPERIENCE

JULY 2022-JANUARY 2024

Advanced Application Engineering Analyst

Accenture | Chennai, India

- Leveraged data analysis to recommend and implement system performance improvements for a 15-year global telecommunications project.
- Ensured compliance with 4 data safety regulations throughout all stages of project development.
- Collaborated with cross-functional order fallout and security teams of over 30 members to verify and validate smooth execution of BAU activities
- Conducted research to identify and develop innovative techniques to boost productivity, cutting down the manual labour by nearly 50%.
- Improved component performance with detailed analysis, improving new work order outflow by 40%.
- Monitored logs every morning using ELK Stack to direct flow of work orders seamlessly and alerted the necessary teams ASAP on discovering issues.
- Identified issues and closed legacy work orders, improving legacy work order outflow by 30%.
- Trained and mentored 3 junior analysts, enabling faster onboarding and consistent adherence to best practices.
- Investigated and resolved 40+ monthly incidents, including stuck and misrouted work orders, reducing backlogs by 25% and minimising service downtime for clients.

- Documented incident patterns and resolution steps, easing knowledge transfer and decreasing onboarding time for new team members by 50%.
- Analysed abnormal work order behaviour with teams to identify root causes, cutting incident recurrence rates by 30%.
- Participated in quarterly disaster recovery drills, verifying 30+ system backups and achieving full data recovery within defined RTO/RPO targets.

EDUCATION

Master of Science (M.S.) - Cyber Security
Cardiff University, Cardiff, United Kingdom

September 2025

- Obtained Scholarship - Vice-Chancellor's International Scholarship
- Scored High Distinction (> 80%) in **Business Continuity and Transformation**, and **Cybersecurity Operations**
- Scored Distinction (> 70%) in **Cybersecurity and Risk Management**, **Computer and Network Forensics**, and **Developing Secure Systems and Applications**
- Scored Merit (> 60%) in **Penetration Testing and Malware Analysis**

Bachelor of Technology (B. Tech.) - Computer Science and Engineering
Vellore Institute of Technology, Chennai, India

August 2022

- Member of the Debate Society
- Graduated with 8.64 CGPA

PROJECTS

- Wards and Firewalls - Designed and developed a card-based, D&D-style game that gamifies Cyber Security Awareness training for non-technical audiences; earned positive reviews from the Cyber Innovation Hub and DTII, and increased cybersecurity awareness among novice users by 92.5%
- PixelTrue Engine - Built a Deepfake detection tool for images and videos that achieved 92% accuracy and secured 1st place at the ISB Hackathon
- Smart Image Repost Detection - Created and implemented an algorithm leveraging pattern matching and visual similarity analysis to identify skewed and edited image reposts with 90% accuracy
- Threat Intelligence Dashboard - Developed a Threat Intelligence Dashboard (Python/Flask, JS) integrating AbuseIPDB/VirusTotal APIs for IP/hash checks and an RSS news feed
- FlagQuest V - Developed a mini-CTF (Capture The Flag) web platform, implementing diverse security challenges (e.g., SQLi, XSS) to demonstrate practical offensive security skills.

CERTIFICATIONS

- Google Cybersecurity Certificate
- The Complete Cyber Security Course (Parts 1 to 4) [Udemy course by StationX]
- 100 Days of Code: The Complete Python Pro Bootcamp [Udemy course by The App Brewery]
- The Complete Full-Stack Web Development Bootcamp [Udemy course by The App Brewery]
- Pre-Security by TryHackMe
- Cyber Security 101 by TryHackMe
